

Mukharrahmah M. Kasim

Geologist

Profile

A field-oriented geologist with exploration experience in the gold mining industry, specializing in low-sulfidation epithermal, high-sulfidation epithermal, porphyry, and intrusion-related gold system (IRGS) deposits. I am detail-oriented, analytical, and capable of consistently delivering high-quality results in challenging and pressurized work environments.

Work Experience

Jan 2025 - Present JV PT Indotan - Eqleed (Kingdom of Saudi Arabia)

Exploration Geologist

As an Exploration Geologist on an overseas assignment, I was deployed to the Kingdom of Saudi Arabia (KSA) to support multi-stage mineral exploration programs across the Al-Dawadimi, Al-Qasim, Riyadh, and Madinah Regions. Exploration activities focused on systematic evaluation of mineralized systems through integrated field-based investigations. My responsibilities included conducting detailed geological mapping at regional, prospect, and target scales, implementing soil, channel, and trench sampling programs and executing grid mapping to delineate lithological boundaries, structural controls, and mineralization trends. I was actively involved in the interpretation of surface geology, alteration styles, and structural frameworks to generate and refine exploration targets. In addition, I supervised and coordinated field crews, ensuring adherence to health, safety, and environmental (HSE) standards while maintaining data quality and operational efficiency. I was responsible for geological data integration, interpretation of maps and assay results, and the preparation of comprehensive weekly and monthly technical reports to support decision-making and exploration planning.

Mar 2021- Dec 2024 PT Nusa Halmahera Minerals / NHM (Indonesia)

Exploration Geologist

As an Exploration Geologist with the Porphyry Regional Team and Project Generation Team, I was assigned to exploration activities in the Porphyry Regional prospects (Toguraci, Matat, and Rawa) as well as low- and high-sulfidation epithermal systems within the Gosowong COW. My responsibilities included conducting comprehensive geological mapping from regional to prospect scale, soil sampling, grid mapping, scout drilling, and supporting diamond drill programs. I also supervised MT and CSAMT programs, managed field crews, ensured safety compliance, and coordinated emergency response plans, investigations, and training.

Education

- **Sekolah Tinggi Teknologi Nasional Yogyakarta**
Geological Engineering
2011-2016

Skill

- ♦ Leapfrog 5.1
- ♦ Micromine 2021
- ♦ Surpac
- ♦ Arcgis
- ♦ TSG 8.0
- ♦ Mapinfo Pro 2021
- ♦ IoGas
- ♦ ASD Terraspec
- ♦ NITON XL3-t
- ♦ QGIS 3.42
- ♦ Agisoft

Training

- Frontliner Operational Supervisor (POP) – BNSP Jul, 2020)
- Mining Safety Management System (SMKP) – ESDM Malut Aug, 2020)
- Occupational Safety & Health (AK3U) – Kemenaker Mar, 2018
- Leapfrog Geo : Implicit Modelling, Geostatistic & Resources Estimation Case Study Epithermal & Porphyry Gold Deposit – BPT, 2024
- Surpac : Geological Modelling & Resource Estimation, Case Study ; Nickel Deposit – Geolaterit, 2016
- Online Training, ioGAS Introduction with Case Study in Epithermal Deposit – Agincourt, Olympiar 2024
- Helicopter Landing Officer, NHM 2022
- First Aid Level 1 and Fatigue, NHM 2023
- Basic Fire Fighter Training, NHM 2023
- HIRA & JSEA, NHM 2023
- Incident Investigation and Reporting, NHM, 2023

Awards

- Nov 2021 | Muhammadiyah University
Guest lecturer with topic Regional Exploration in Porphyry Deposit.

Affiliation

- IAGI (Indonesia Association of Geologist)
-

2019 - 2021

PT Sumber Ardi Swarna (Indonesia)

Project Geologist

As a Project Geologist, I was responsible for exploration activities including prospecting, geological mapping, surface sampling, test pitting, supervising and conducting marine drilling with contractors, and reviewing bathymetric mapping data using drones. I conducted geological studies to support exploration and mining processes across four companies: PT Sumber Ardi Swarna, PT Karya Intan Maksima, PT Karunia Artha Kamilin, and PT Wirabudi Putra Perkasa. I was assigned to supervise and actively participate in the mining process, from Trailing Suction Hopper Dredger (TSHD) operations to magnetic separation and hauling to the stockpile area for grade control monitoring. I also played a pivotal role in planning and coordinating with engineering teams to ensure efficient mining processes and the achievement of production targets.

2017 - 2018

PT Branjangan Industri Utama (Indonesia)

Exploration Geologist

As a Geologist, I was responsible for exploration activities including prospecting, geological mapping, and surface sampling. I prepared and reviewed SOPs for exploration activities, designed exploration programs and budget proposals, conducted geological studies for exploration and mining activities, supervised geophysical exploration, and provided regular technical reports to management and regulatory bodies. On several occasions, I was assigned to a nickel prospecting project with PT Zhong Hai Rare Metal in Central Halmahera for approximately four months. I also managed a team supporting exploration and geophysical surveys for PT Tambang Gamping Indonesia, where I provided exploration reports and contributed to feasibility studies.
